

# Business Architecture Evolution

Business Architecture ownership and accountability has evolved throughout organizations since its inception

## Evolution Spectrum

### IT Driven

Business Architecture approach is driven by IT

- Project Focused
- IT ownership and governance
- Single tools and processes across IT

### IT/Pyramid Based

Creating better relationships between Business and IT

- Relationship/Communication focused
- Many owners accountable across organizations
- Teams develop and evolve own tools and processes

### Business Driven

Drives Strategy Execution and Transformation

- Strategy & Capability Focused
- Business ownership and governance
- Single tools and processes across Enterprise

## Today's Discussion

- Where is your organization on the evolution spectrum today?
- What triggers caused you to move in either direction?
- What are the pro's and con's of each position?
- Do you anticipate any movement in the next 2 years? If so, what is driving that change?
